

AWQMS 3.01 Patch

Enhancements

- 2102 ANOVA Reports - allow a user to only include data from a certain period with each year and also to calculate a mean value for each month/year

Bugs that have been fixed

- 2242 Standard Deviation values on Exceedance Export and Single Characteristics Statistics Report do not match. We were using a "sample" standard deviation in one case and a "population" standard deviation in another. All have now been changed to a population standard deviation.
- 2238 When attempting to access the Metric Detail Page, an error consistently occurred
- 2221 Exceedance Detail export crashed when certain criteria was used.
- 2220 Exceedance Summary export crashed when certain criteria was used.
- 2219 Multi characteristic line graph crashed when certain criteria was used.
- 2218 Index score graph crashed when certain criteria was used
- 2190 Import process isn't making sure the Metric Type Context is valid for the Org ID in the import file
- 2189 Administrator Role was required to create new Analytical Methods (even when they are for a specific organization)
- 2153 Index Score Graph – Criteria Page is showing all Index Types rather than just the ones that match the other criteria
- 2079 Thresholds Lookup Table page crashes when you click Return before loading any Threshold Groups
